INSTALLATION INSTRUCTION FOR 4951

READ AND SAVE THESE INSTRUCTIONS

PREPARATION

1. Shut off the power at the fuse box or circuit breaker box. If necessary, remove the old fixture, including all mounting hardware.
2. Carefully remove the fixture from the carton and check that all parts are included as shown in the illustration.

ASSEMBLING THE FIXTURE (Fig. 1)

3. Place the glass panel (I) into the decorative ring (K), then using the sheet metals (L) to compact the glass panel (I).
4. Secure the decorative ring (K) to the bottom of shade (G) with the screws (J).
5. Secure the mounting ring (M) of the shade (G) to the iron plate (H) with the screws (F).
6. Install the light bulb(s) (not included) in accordance with the fixture's specifications **(DO NOT EXCEED THE MAXIMUM WATTAGE!) (NE PAS DEPASSER LA PUISSANCE NOMINALE MAXIMALE!)**

MOUNTING THE FIXTURE (Fig.1)

7. Thread the two mounting screws (C) (Size: #8-32*1.3"L) part way into the crossbar (B). Secure the crossbar (B) to junction box (not provided) with the junction box screws (A) (Size: #8-32*0.6"L). The side of the crossbar (B) marked "GND" must face out.

CONNECTING THE WIRES (Fig. 2)

8. Connect the fixture wires to the junction box wires as shown in Fig. 2, making sure all wire connectors are secured. If your outlet box has a ground wire (green or bare copper), connect the fixture's ground wire to it. Otherwise, connect the fixture's ground wire directly to the mounting plate using the green screw provided. After the wires are connected, tuck them neatly inside the junction box.

COMPLETING THE INSTALLATION (Fig. 1)

9. Raise the canopy (D) allowing for the mounting screws (C) to protrude through the holes on the canopy (D), then secure with the finials (E).

   Your installation is now complete. Return the power to the junction box and test the fixture.
